01 PROFESSIONAL SUMMARY

Director of Product & Technology with 6+ years of experience leading cross-functional design, development, QA and product teams. I combine **Product Management**, **Project Management** and **UX/UI design** to take digital products and **AI-driven solutions** from product discovery to launch and impact measurement. Specialized in Agile methodologies (Scrum, Kanban), product roadmap definition, stakeholder management and process automation with AI agents to shorten time-to-market.

02 CORE SKILLS

Product Management · Product Strategy · Product Roadmap · Team Leadership · Project Management · Product Discovery · Scrum · Kanban · Design Thinking · Lean UX · Stakeholder Management · KPIs & Product Metrics · UX/UI · UX Research · Prototyping · Design Systems · UX Audit (Nielsen heuristics) · Generative AI · AI Automation · Frontend (React) · Digital Transformation

03 WORK EXPERIENCE

Director of Product & Technology
May 2025 – Present

Delsud · Argentina

- Lead a cross-functional team of designers, developers and product managers using Agile methodologies (Scrum and Kanban).
- Define the product and technology strategy and the product roadmap, aligned with business goals.
- Implement productivity and quality KPIs to drive continuous improvement across the team.
- Introduce AI agents and automation tools to optimize processes and reduce delivery times.

Project Manager
Jan 2022 – May 2025

LIMBO · Argentina

- Managed digital projects end-to-end applying Scrum and Design Thinking.
- Coordinated design, development and QA teams, increasing the team's operational efficiency.
- Managed client and stakeholder communication, ensuring delivery of high-value solutions.

Web Designer & Frontend Developer
Jun 2024 – Jul 2024

Albanghu · Remote

- Designed and developed a strategic landing page that strengthened the company's visual identity.
- Customized a Bootstrap-based system to improve the digital product's scalability.

Senior UX/UI Designer
2020 – 2022

iMCreate LLC · New York, USA · Remote

- Led international projects with a user-centered design (UCD) approach.
- Supervised design and development teams, improving the usability of digital products.

04 SELECTED PROJECTS

Filo · Booking SaaS for hair salons · White-label digital product · 2026
Product discovery and role-based flows (client, stylist and owner): 4-step mobile booking, per-stylist schedule and revenue tracking. Clickable demo ready for salon pilots.

Ahorrandy · Personal finance app · In production with real users · 2026
Defined the brand, visual system and a mobile-first flow to log expenses in pesos and dollars; continuous iteration based on usage and error data.

CRM for insurance brokers · Product leadership · In production
Specialized CRM designed with the sales team around their real day-to-day commercial model.

Cascading task management · Design and leadership · In production
Task dashboard from leadership down to operators, with real-time progress and approvals.

B2B industrial social network · Product · In production
Company profiles, industry communities and a news feed for businesses in industrial parks.

UX audits for companies · Consulting
Evaluation of live digital products against Nielsen's 10 heuristics, with an improvement plan prioritized by severity and business impact.

05 TOOLS

Design and prototyping: Figma (advanced), Adobe XD, Adobe Illustrator.

Product and project management: Jira, Trello, Notion.

Development and AI: Claude Code (advanced), Vercel (advanced), GitHub, Visual Studio Code, Supabase, React, Bootstrap.

06 KEY ACHIEVEMENTS

- Implemented design systems that improved team efficiency.
- Led international projects with measurable usability results.
- Led digital transformation projects, optimizing internal processes and the customer experience.
